

# DigitalPersona® Mobile ID

Mobile Identification Application for Rapid ID

## OVERVIEW

DigitalPersona Mobile ID is a rapid identification application that draws on years of Crossmatch™ experience providing identity management software and handheld solutions to the law enforcement, defense and homeland security markets. Mobile ID is a highly configurable Android-based application and supports a wide range of state and agency submission configurations\*, as well as user and administrative workflows and settings.

Designed for intuitive use with rapid biometric and biographic input in the field, Mobile ID requires minimal officer training and promotes situational awareness. When installed on the Crossmatch Verifier® Sentry handheld, the Mobile ID application provides best-in-class PIV-certified 500 ppi images for processing and matching, as well as auto-population of biographical data from standard ID cards.

DigitalPersona Commander, an optional device management software, seamlessly interfaces with Verifier Sentry and the Mobile ID application to aggregate AFIS submissions from numerous Sentry devices. Commander routes the submissions to predetermined or user selected AFIS and directs corresponding responses back to the individual requesting handheld with Mobile ID application.

*\*when used with DigitalPersona Commander*

## BENEFITS

- Rapid in-field identity assurance
- Minimal training required
- Intuitive user interface
- Simultaneous processing of multiple submissions
- Simple biographical information input
- CJIS compliant multi-factor login
- Compliance and administrative logs
- Android-based application

## ABOUT CROSSMATCH

Crossmatch helps organizations solve their identity management challenges through biometrics. Our enrollment and authentication solutions are trusted to create, validate and manage identities for a wide range of government, law enforcement, financial institution, retail and commercial applications. Our solutions are designed using proven biometric technologies, flexible enrollment and strong multi-factor authentication software, and deep industry expertise. We offer an experienced professional services capability to assess, design, implement and optimize our identity management solutions for a customer's individual challenges. Our products and solutions are utilized by over 200 million people in more than 80 countries.
