

# Universal Cabinet

## BENEFITS

- Ergonomic design, tailored to the needs of booking officers
- Convenient layout of all user control elements and consumables
- Locked physical protection for scanner, monitor, keyboard and PC
- Long life, industrial-grade kiosk designed for harsh environments

## PRODUCT DESCRIPTION

Fingerprinting suspects is a daily requirement for law enforcement personnel. It calls for rapid, high quality capture and biographical data input for quick identification and background checks through inquiries to local or remote AFIS databases.

The Crossmatch® Universal Cabinet accommodates all FBI certified forensic-quality L Scan® palm print and Guardian® family ten-print fingerprint scanners. All user control elements are arranged ergonomically to make the job of booking officers as easy and safe as possible. The large flat screen display with optional touch screen functionality is located in an optimal position and displays the captured fingerprints in full resolution.

The workspace surrounding the scanner provides additional area for placing documents or connecting additional input devices, such as signature capture devices. Foot switch controls are conveniently located at both front corners.

Capturing all prints and textual data is an intuitive process that takes just a few minutes. The optional camera mounting bracket allows convenient fixed installation of a video or still camera to capture mug shot and scar, mark and tattoo (SMT) images. In addition, a flexible mount is offered for securing a Crossmatch I Scan 2 (iris scanner). The Universal Cabinet was designed to deliver optimum performance and reliability in an easy to use configuration whether processing cooperative or uncooperative applicants.

## ABOUT CROSSMATCH

Crossmatch helps organizations solve their identity management challenges through biometrics. Our enrollment and authentication solutions are trusted to create, validate and manage identities for a wide range of government, law enforcement, financial institution, retail and commercial applications. Our solutions are designed using proven biometric technologies, flexible enrollment and strong multi-factor authentication software, and deep industry expertise. We offer an experienced professional services capability to assess, design, implement and optimize our identity management solutions for a customer's individual challenges. Our products and solutions are utilized by over 200 million people in more than 80 countries.
